

MITUTOYO UK LTD

Project

Integration of new eCommerce site into existing ERP system

Requirements

- Allow individual customers to access live stock figures and account specific pricing 24/7
- Remove need for manual updating of the system based on eCommerce activity

The Challenge

- Allow order, customer and stock information to flow seamlessly between the new Magento eCommerce site and existing ERP system.

MITUTOYO UK LTD

The KFA Solution

Creation of Application Programme Interface between eCommerce web solution and existing ERP system

- Utilises RESTful web services written in Spring Java
- Platform neutral, scalable and easily maintained

The Outcomes

- Enhanced accuracy and speed of data flowing to and from ERP system
- Reduced processing costs
- Enhanced take up of e-commerce site
- Increased customer satisfaction and engagement

“KFA Connect deliver a first class service with a minimum of fuss.”
